**News:**

*Hello! This month I have to working on Strategic Priority 4.0 and 3.1.2 with my movie night event. I really want to thank my Engineering and Computer Sceince Joint Council for working together to plan 2 great social events for everyone, ECS, and NSM. The Movie will be taking place on Nov 19th and I'm currently planning a ECS & NSM Turkey Bowl event where for both events I plan to ask attendees to donate cans for a special prize.*

*Additionally, one unique category of events I put on my event calendar are technical activities including clubs and competitions. As students of engineering and computer science we are heavily assessed based on our application of our skills, not just the theory behind it. Thus, I wanted to show my students that being apart of a technical club or prepping for a competition is what separates students in a panel or white-board interview and prepares them for a college into career pipeline.*

***Dates to look out for:***

***Spare Parts Movie Night & Food Drive***

*Nov 19th 7-9pm University Housing*

*Pizza and Popcorn provided, club with the most donations in accordance to ASI [Food Points](#) wins a Pizza Party up to \$100 .*

***ECS Career Fair***

*Oct 25th 9 - 3 pm*

**Committee Updates:**

Associate Dean Search Committee: Met 10/3,10/17 set new meeting for next month  
Procedural Appeals Committee: Meeting 10/28 to complete a new task  
ASI Memorial Scholarship Committee: Recently appointed

**Strategic Priority Updates:**

My biggest strategic priority lies in Strategic Priority 4.0: Enhance Academic/Student Success. Met 9/25/19 & 10/9/19 to discuss 4.0, specifically 4.1: Work with Colleges/Programs to identify learning opportunities to bridge the college to career gap. In these meetings we spoke about 4.1.3 (Investigate current strategies being used by departments to support career/academic success) and how each of our colleges work with their students. Additionally, Engineering and Computer Science Joint Council is hosting a movie night food drive for the ASI Food Pantry which directly affects Strategic Priority 3.1.2.
